**Important:** The instrument cluster is designed to let you know about many important aspects of your vehicle’s operation. The message center can provide critical information to prevent damage to your vehicle. It is important to read your Owner Manual and become familiar with the information that is being relayed to you by the lights, gauges and indicators, particularly the message center, and what action can be taken to ensure your safety and to prevent damage.
Heated Front Seats

This feature allows you to heat the front seatbacks and seat cushions simultaneously or just the seatbacks. Three heat settings are available. The controls are located on the driver and front passenger door panels.

Select a heat setting for both the seatback and seat cushion
1 Press and release the horizontal button until the indicator light shows the desired setting.

Select a heat setting for the seatback only
2 Press and release the vertical button until the indicator light shows the desired setting.

Power Lumbar/Bolster Front Seats

Adjust lumbar support
• Press the front or rear of the control located on the side of the seat cushion near the door. Release at the preferred setting.

Adjust side bolster support
• Press the top or bottom of the lumbar control. Release at the preferred setting.

Second Row Seat Features

Use the button located on the back of the center console to select one of two heat settings for the second row seat cushion
• Press the button once for High; twice for Low. Press it again to turn off the heat feature.

Fold either side of the second-row bench seat
Both sides of the second row seat can be folded down for extra cargo capacity or access to the Midgate™.

To fold, follow these steps:

1 Pull up on the strap at the rear of the seat cushion and pull the cushion forward into an upright position.
• Pull the seatback forward so that it folds down into a flat position.

Return seat to occupant position
• Lift and move the seatback into the upright position.
• Return the cushion to the seating position until it latches.

Passenger Automatic Locking Restraint (ALR)

The safety belt is designed to lock during an accident, but it will also lock if it is pulled out all the way during initial buckling, and you may be unaware that this has happened. If the safety belt does lock, unbuckle it and allow it to retract fully, then pull it out and re-buckle the belt.
POWER FOLDING MIRRORS

Fold mirrors

1. Move the selector switch located above the mirror control to the center position.
2. Press the right side of the four-way control pad to fold the mirrors in.
   • Press the left side of the four-way control pad to fold the mirrors out.

If the mirrors have been folded manually, they must be moved through the power folding cycle three times to reset them in their tracks.

AUTOMATIC DIMMING REARVIEW MIRROR WITH ONSTAR®, COMPASS AND TEMPERATURE DISPLAY

When on, the automatic interior dimming rearview mirror automatically dims to the proper level to minimize glare from lights behind you when it’s dark outside.

Turn the self-dimming function on or off

1. Press and hold this button for approximately eight seconds.

Use the OnStar® Communications system

3. Press to connect to an OnStar® Advisor.
4. Press to answer or end a call from the OnStar® Center.

Display temperature

1. Press and hold for four seconds to toggle between °C and °F. Once the desired °C or °F is displayed, release the button. Wait four seconds and the temperature will be displayed.

Turn the outside temperature displays and compass readings on or off

1. Press this button.

Press this button.
Automatic Climate Controls

DUAL-ZONE CLIMATE CONTROL SYSTEM

EXT's Dual-Zone Automatic Climate Control System features dual zone operation for the front passengers.

Adjust settings for automatic operation
1 Push the AUTO button and adjust the temperature knob (2) to the desired temperature to set automatic air delivery mode, fan speed, A/C and recirculation functions for the driver. (Note: Because this is an automatic system, the A/C mode is the default setting.)

Set same temperature for driver and front passenger
1 Press and hold the AUTO button for four seconds.

Select air distribution manually
3 Press and release the MODE button until the desired source of air is indicated on the display.

Manually raise or lower fan speed
4 Press the upper or lower portion of the FAN control button.

Adjust settings for operation
3 Adjust air delivery location with mode control button.
2 Adjust driver/passenger temperatures with knobs as shown.
4 Press fan speed button to desired setting.

Additional Climate Control System Functions

Air conditioning: Recirculates interior air while in Vent, Bi-Level positions. To prevent window fogging, Recirculation will not operate in the Defog, Defrost or Floor mode.

C: Turns the air conditioning system on and off. This symbol (__) appears on the display when the A/C system is turned off.

Note: When the climate control system is in the OFF position ( ), outside air will continue to enter the vehicle and will be directed according to the mode position selected. This is normal climate control operation.

SUNROOF (if equipped)

Close the sunroof
1 Hold the front portion of the button down until the sunroof motor stops. The sunroof will tilt up slightly to seal. This is normal.
AM/FM STEREO WITH CD AND CASSETTE PLAYER

Set the time
1. Press and hold the HR button until the correct hour appears on the display.
2. Press and hold the MN button until the correct minute appears on the display.

Note: The time may be set with the ignition on or off.

Program radio station presets
- Turn the radio on.
- Press BAND to select the band (AM, FM1/FM2/XM1/XM2).
- Use the seek or tune knob to tune in the desired station.
- Press AUTO EQ or AUTO TONE (as applicable to your radio) to select the equalization that best suits the type of station selected.
- Press and hold one of the six numbered buttons until a beep sounds; release the button.
- Repeat these steps for each station preset, using a different numbered button for each station.

Access one of the two available XM Satellite Radio bands
- Press the BAND button until XM1 or XM2 appears on the display.
- To exit Quick Load, press either a number with a CD in it or LOAD.

Quick Load:
1. Press LOAD for two seconds. The lowest available number will flash.
2. Wait for amber lights to flash on sides of slot before inserting CD. The next available number will flash and accept another CD until all are occupied.

Quick Unload:
- Press EJECT ( ) for two seconds; all CDs will eject from highest number to lowest.

SIX-DISC CD CHANGER

Loading/Unloading

Quick Load:
1. Press LOAD for two seconds. The lowest available number will flash.
2. Wait for amber lights to flash on sides of slot before inserting CD. The next available number will flash and accept another CD until all are occupied.

Quick Unload:
- Press EJECT ( ) for two seconds; all CDs will eject from highest number to lowest.
Load 1 CD
- Press LOAD; all available numbers will flash amber.
- Select the number desired.
- Wait for amber lights to flash on sides of slot before inserting CD.
- Repeat to load more CDs.

Unload 1 CD
- Press EJECT.
- Press number for CD desired.

Play a CD
- Option 1: Select the number for the CD desired (wait eight seconds).
- Option 2: Press 5/SIDE button on radio face to scroll through CDs.

Select CD Track
- Option 1: PREV/NEXT on radio.
- Option 2: SEEK arrows on radio.
- Option 3: SEEK arrows on steering wheel.

NAVIGATION RADIO SYSTEM

Preset a radio station
1. Press the power button to turn the radio on.
2. Press BAND button repeatedly to choose one of the following bands: AM/FM1/FM2 or XM1/XM2 (if equipped).
3. Use either the joystick or the SEEK button to tune to a station.
4. Press and hold one of the six buttons on the right side of the radio until you hear a beep or see the station displayed next to the button pushed.

Set the time
- Turn the radio on.
- Press the CONFIG hard key.
- Press the CLOCK hard key.
- Use joystick to highlight the hour and minute box (near top of screen).
- Move joystick up or down to select correct hour and minute(s).
- Push the joystick in to store the correct time.

HomeLink® TRANSMITTER
Program HomeLink
Your vehicle’s engine should be turned off while programming the transmitter. Follow these steps to program up to three channels:

1. Press and hold down the two outside buttons, releasing only when the indicator light begins to flash, after 20 seconds. Do not hold down the buttons for longer than 30 seconds and do not repeat this step to program a second and/or third transmitter to the remaining two HomeLink buttons.

2. Position the end of your hand-held transmitter about 1 to 3 inches (3 to 8 cm) away from the HomeLink buttons while keeping the indicator light in view.

Refer to Owner Manual for further information.
3. Simultaneously press and hold both the desired button on HomeLink and the hand-held transmitter button. Do not release the buttons until Step 4 has been completed.

4. The indicator light will flash slowly at first and then rapidly after HomeLink successfully receives the frequency signal from the hand-held transmitter. Release both buttons.

5. Press and hold the newly trained HomeLink button and observe the indicator light. If the indicator light stays on constantly, programming is complete and your device should activate when the HomeLink button is pressed and released.

To program the remaining two HomeLink buttons, begin with Step 2 under "Program HomeLink." Do not repeat Step 1, as this will erase all of the programmed channels.

Note: If your transmitter has a “rolling code” feature, the above process may not work. Please refer to your Owner Manual or contact HomeLink at 1-800-335-3515 (www.homelink.com).

---

STEERING WHEEL CONTROLS
(OnStar®/Radio)

1. This button will activate “personal calling.” Pressing this button also acts as a “barge in” for voice mail.

2 PROG: Sequence through stored presets for AM, FM and XM radio.

3 ▲ SOURCE▼: To select AM, FM1, FM2, XM1, XM2 Satellite Radio, cassette, CD, in-dash 6-Disc CD Changer, RSE

4 ▲ SEEK▼: Seek radio stations, CD tracks

5 ▲ VOL▼: Adjust Radio volume

AUTOMATIC HEADLAMP CONTROLS
Turn off Daytime Running Lamps (DRL) and automatic headlamps

- Turn the exterior lamps knob to the left of the steering wheel to OFF (Ω).

Activate the automatic headlamp system
- Turn the exterior lamps knob to AUTO. The automatic headlamp system will turn on the front and rear lamps.

Manually illuminate the parking lamps, taillamps, instrument panel/radio lights, license plate lamps
- Turn the exterior lamps knob to the parking lamp position (Φ).

Manually activate the headlamps, all exterior tail/marker lamps and the instrument panel/radio lights
- Turn the exterior lamps knob to this position (Φ).

Turn the fog lamps on or off

1. Press the fog lamp button located on the left side of the instrument panel. An indicator lamp will illuminate when the fog lamps are on.

2. Press to turn cargo lamp on or off
Drive and Security Systems

**STABILITRAK® SYSTEM**
StabiliTrak helps you maintain direction control during most driving conditions. In some driving situations, such as becoming stuck on slippery terrain and vehicle "rocking" is required to free it, it may be necessary to limit StabiliTrak control. The StabiliTrak limit button decreases the amount of Traction Control engagement and disables the lateral and yaw sensors.

**Limit StabiliTrak**
- Press the StabiliTrak button (shown above) located on the instrument panel.

**ULTRASONIC REAR PARKING ASSIST (URPA)**
This feature helps you determine how close an object is to your rear bumper. Both a variable audible chime and a visual display located in the center of the rear upper trim panel convey distance to an object.

**Disable URPA**
- Press the URPA on/off button located near the climate control system and radio.

**TIRE PRESSURE MONITOR**
This feature alerts you when a large change in pressure occurs in one of your vehicle’s tires. If this occurs, a CHECK TIRE PRESSURE message will appear in the instrument panel cluster. This message will remain on until you reset the system.

**Reset the tire pressure monitor**
- To reset the tire pressure message, you must fill the tires with the correct amount of air.
- Pressing the cluster stem button on your instrument panel cluster or the Reset button on your steering wheel will temporarily eliminate the message. However, at the next vehicle start-up, the message will reappear. The tire pressure must be corrected to permanently eliminate the message.

**CONTENT THEFT-DETERRENT SYSTEM**
**Arm the System**
- Lock the doors using the power door lock switch or the Keyless Entry System transmitter. The alarm is activated when the symbol (    ) goes off (approximately 30 seconds).

**Use the Driver Information Center to program the alarm to one of the following**
- Both Horn/Headlamps
- Horn only
- Lamps only
- Off

**Note:** Your vehicle’s factory default setting is Horn and Lamps. See the Vehicle Personalization section of this booklet for more information.

Refer to Owner Manual for further information.
Vehicle Personalization

MEMORY POSITIONS FOR DRIVER’S SEAT, MIRRORS, PEDALS, RADIO AND CLIMATE CONTROLS

Use the driver’s door mounted controls to:

- Adjust driver seat, including lumbar adjustment
- Adjust gas and brake pedals
- Adjust the outside rearview mirrors
- Set the radio presets and climate control temperature

To store the above settings, press and hold Memory 1 or 2 until two chimes sound (about four seconds). To set up for another driver, repeat the process with the other memory button.

These settings can be restored by pressing the Memory 1 or 2 button on the driver’s door, or by using the Remote Keyless Entry (RKE) transmitter. Note: The vehicle memory settings will correspond to the number on the RKE: 1 or 2.

Set Easy Exit Driver Seat position

1. Briefly press memory button 1 or 2 (depending on which RKE you have)
2. Adjust the seat to the desired exit position.
3. Press and hold the exit button (✓) on the driver’s door until two chimes sound. (Note: Seat Exit must be “On” in your programmed settings.)

DRIVER INFORMATION CENTER PERSONALIZATION

You can personalize your vehicle with the following features:

- Automatic Locking
- Delayed Locking
- Automatic Unlocking
- Remote Lock Feedback
- Remote/Unlock Feedback
- Headlamps On at Exit
- Perimeter Lighting
- Seat Position Recall
- Easy Exit Driver Seat
- Curb View Assist
- Alarm Warning Type
- Display Language
- Display Units

Select Options

To cycle through the features below, use the Menu button (عارض) located on your steering wheel. Use the Select button (حذف) to choose your desired setting. The last setting remaining on the display will be the selection of choice. Continue cycling through the menu to set other preferences.

Automatic Door Locking
1. Lock Doors Out of Park
2. Lock Doors Manually
3. Lock Doors with Speed (approx. 8 mph)

Delayed Locking
1. Delayed Locking ON
2. Delayed Locking OFF

Automatic Door Unlocking
1. Unlock All in Park
2. Unlock All at Key Out of Ignition

Note: Memory 1 or 2 is dependent on the RKE transmitter being used and the key being in the ignition during programming.
3. Unlock Manually
4. Unlock Driver Only in Park

Remote Lock Feedback
1. Flash Lamps
2. Sound Horn
3. Both Lamps and Horn
4. Off

Remote Unlock Feedback
1. Flash Lamps
2. Sound Horn
3. Both Lamps and Horn
4. Off

Seat Position Recall Options
1. Seat Position Recall Off (Memory Seat position will only be recalled when you press the memory button 1 or 2 on the driver’s door)
2. Seat Position Recall at Key In

Easy Exit Driver Seat position
1. Easy Exit Seat ON
2. Easy Exit Seat OFF

Curb View Assist Options
1. Curb View Off
2. Curb View Passenger
3. Curb View Driver
4. Curb View Both

The Curb View Assist feature automatically tilts your outside mirrors downward to allow you to see curbs when backing up (Default setting).

Set Curb View Assist position
- Enable one of the four selections above.
- Adjust the mirrors while the vehicle is in reverse. When the vehicle is shifted out of reverse, your selection is saved in Memory 1 or 2.

ODOMETER/TRIP SETTINGS
Your vehicle’s personal trip and business trip odometers operate only when they are turned on.

Enable the system
1. Press the Trip button until the words “Personal” or “Business” appear.
2. Then press Select to turn the Personal or Business trip computer on or off.

Reset trip information
- Press and hold the Select button for two seconds while viewing any of the trip modes on the Driver Information Center.

Use the above procedure to monitor the following settings:
- Personal/Business: Miles
- Personal/Business: Gal
- Personal/Business: MPG
- Personal/Business: Average MPH
- Personal/Business: Annual % Usage
- Business: Hourmeter (Total Engine Run Time)
- Business: Timer
- Business: Annual Log

Access fuel information
3. Press the Fuel information button to view the following:
- RANGE: The remaining distance you can drive without refueling. (Fuel range cannot be reset.)
- AVG ECON: How many miles per gallon your vehicle is getting based on current and past driving conditions. To reset AVG ECON, press and hold the Select button for two seconds while AVG ECON is displayed in the Driver Information Center.
- INST ECON: How many miles per gallon your vehicle is getting at the particular moment in time. (Instant Fuel Economy cannot be reset.)

Note: You can select and reset trip features by using the Trip Odometer Reset Stem located on the instrument panel cluster.

Refer to Owner Manual for further information.
Utility Enhancement System

MIDGATE™ COMPONENTS

1 Latch Levers
2 Grab Handles
3 Glass-Catch Release Button
4 Glass Lock Knobs
5 Midgate Release Handle
6 Window Retaining Tabs

CARGO AREA MIDGATE PANEL

Your vehicle is equipped with a Midgate Panel and removable rear window. The Midgate allows you to substantially extend the length of the vehicle’s cargo area.

MIDGATE OPERATION

Remove and store rear window
Fold rear seats down.
1 Squeeze and pull down latch levers at each upper corner of rear window to release window.

Hold glass in place and press “glass-catch” release button, allowing window to tilt forward.
Lift window from lower window frame channel using grab handles.

2 Lower window into Midgate storage pocket, using lower edge of glass to guide it behind the three rear glass retaining tabs.
With grab handles facing you, hold glass against storage pocket until next step.
3 While pressing window flat into storage pocket, turn lock knobs clockwise until arrows align with "lock" symbols. (You may have to push the corner of the window slightly to allow the knob to fully lock.)

Return rear-window latch levers to closed position until hearing a "click."

With window securely stored, return seat to normal position. Press down on seat cushion and forward on the seatback to ensure it is locked.

**Reinstall the rear window**

Squeeze and pull down on rear-window latch levers.

Hold window in place and turn lock knobs to unlocked position.

Use grab handles to lift window from storage well behind retaining tabs.

With rear window tilted toward you, place window into lower channel of window frame.

4 Make sure arrows at bottom of rear window and top of Midgate crossbar are aligned. Apply downward pressure to push window into channel. Using grab handles, press window flat against frame.

5 Holding glass firmly in place, push latch levers up until hearing a click, indicating latch is secured.

**Lower the Midgate**

The Midgate can be lowered from its normal position to extend the cargo area into the rear of the cab. The Midgate can be lowered with the rear window installed in the normal position or removed and stored in the Midgate storage pocket. Before lowering the Midgate, fold rear seats down.

**With Rear Window Installed**

6 Stand outside vehicle and, with one hand against the midgate below the crossbar, support the Midgate.

7 With other hand, turn Midgate handle clockwise to release Midgate and pull it toward you. Gently lower Midgate forward until lying flat on folded rear seat.
Midgate in its normal position. If rear window has been stored, it can be returned to its normal position by following “Reinstall the rear window” instructions.

**CARGO COVER SYSTEM**

Your vehicle is equipped with a three-piece cargo cover system. Any number of the three panels can be installed to provide the exact configuration of space and security to meet your cargo-loading requirements. See your Owner Manual for more information.

**Remove cargo cover panels**

Unlatch panels and slide them out of the cargo box rails. Panel #1 has four latches; panels #2 and #3 have two each. The reinstallation procedure is a reversal of the removal procedure.

**Store cargo cover panels**

The cargo cover panels can be stored on either side of cargo bed using the storage bag provided. To avoid damage, store panels as shown below. The bag’s anchor hooks must be attached to tie-down locations in cargo bed.

With Rear Window Stored

1. Stand outside vehicle and, with one hand against crossbar, support the Midgate.

2. With other hand, turn Midgate handle clockwise to release it. Gently lower Midgate forward until lying flat on folded rear seat.

**Caution:** With the rear window stored and the crossbar being lowered with the Midgate, the Midgate will be noticeably heavier. Use extra care.

**Raise the Midgate**

Raise Midgate with a firm swinging motion to engage latches and secure

**Note:** This convenience guide provides only brief cargo cover operation instructions. See your Owner Manual for more detailed instructions.
Vehicle Symbols Glossary

Following are examples of symbols you may find on your vehicle. It is important to become familiar with them, as they alert you to various vehicle operating conditions.

Air Bag Readiness Light
Air Conditioning (A/C)
Antilock Brake System Warning Light
Brake System Warning Light
Cargo Lamp
Content Theft Deterrent
Cruise Control Set
Dome Lamps Override Button
DIC Trip Information Button (on steering wheel)
DIC Fuel Information Button (on steering wheel)
DIC Personalization Button (on steering wheel)
DIC Select Button (on steering wheel)
Fog Lamps
Headlamps
Instrument Panel Brightness Control
Malfunction Indicator Lamp (Check Engine Light)
Off
Off/On
On
Parking Lamps
Rear Door Security Locks
Rear Window Defogger
Safety Belt Reminder Light
Tow/Haul Mode Light
Traction Off Light

Refer to Owner Manual for further information.
Owner Privileges™

Roadside Service
1-800-882-1112
Roadside Service provides every Cadillac owner with the advantage of contacting a Cadillac advisor and, when appropriate, a Cadillac-trained dealer technician who can provide on-site services.
- Towing Service
- Battery Jump-Starting
- Lockout Assistance
- Fuel Delivery
- Flat Tire Change
  (covers change only)
Trip Interruption – If your trip is interrupted due to a component failure covered under warranty, incidental expenses may be reimbursed, including hotel, meals and rental car.

Courtesy Transportation may also be provided for warranted repairs, including shuttle service for same-day repairs and loaner transportation for overnight repair. Roadside Service is also available to Cadillac customers beyond the warranty period for a charge.

Customer Assistance
1-800-458-8006
Should you need to ask questions, make a comment or request additional information, the exclusive Cadillac Customer Assistance Center is staffed around the clock with professionals to serve you.

When you call Cadillac Roadside Service or Customer Assistance, when possible, please provide the phone advisor with:
- Your telephone number
- Your location
- Your Cadillac’s location
- A description of the problem
- Vehicle ID number
- Year and model of your Cadillac
- Delivery date
- Current mileage

This book contains the latest information available to Cadillac at the time of printing. Cadillac reserves the right to make changes to the product after that time without further notice.
